CASE STUDY
GREVILLE ROAD PROJECT

ENVIROSIEVE TURBIDITY CURTAINS

CONTRACTOR	HEB Construction
CLIENT	NZTA
LOCATION	Albany, Auckland
PRODUCT USED	EnviroSieve™ Curtains, Silt Fence™, Super Silt Fence™, Silt Socks™, DuraForce™ Geotextile.

ADVANCED GEOSYNTHETIC SOLUTIONS™

Contractor HEB Construction used four 25m x 1.5m EnviroSieve™ Turbidity Curtains fastened together to contain sediment from a 100m long section of road works with outstanding results. The Turbidity Curtain has a flotation pontoon at the top, enclosed in a canvas sleeve with a non woven geotextile skirt for effective containment of sediments. The durable materials used allows contractor to re-use turbidity curtains multiple times. A number of other environmental products were also used from Cirtex, Silt Fence™, Super Silt Fence™, Silt Socks™ and DuraForce™ Geotextile for the effective control of sediment laden run off, protecting our waterways.
